Nurseries Located on Moffat Road 8 Miles Northwest of Mobile

Shipping Point, Mobile, Ala.

TERMS OF SALE

TERMS OF PAYMENT—Prices listed here are based on cash payment. Cash with order for immediate shipment. Booking order will be accepted when accompanied by remittance covering 25% of purchase amount; the balance to be payable at time shipments demanded. Shipment may be made C. O. D. for balance when one-fourth of the amount of purchase paid with the order. Be sure to include sufficient amount to cover the postage, if you want shipment made by parcel post.

TRANSPORTATION—State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made, using our best judgment. Our responsibility ceases upon delivery to forwarding companies; claims for losses or damages must be made upon the latter.

ALL QUOTATIONS are immediate acceptance, subject to stock being sold. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

WE GUARANTEE all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received.

CLAIM—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of the goods.

TO OUR CUSTOMERS

We take this opportunity to sincerely thank you for your support of our business, which has been growing very rapidly year after year. In return we have constantly offered stock of highest quality with best service for lowest price possible. To meet your demand satisfactorily our capacity has been enlarged, and efficiency increased every season; yet we see it takes more ground and space than we have now prepared for the next season, as our fall propagation of both Coniferous and Broad-leaved Evergreens has turned out more successfully than our expectation. We must vacate, therefore, some particular patches without delay, and have decided to dispose of some of the stock at real bargain prices. For this reason (and not to compete against the other nurseries) we offer in this catalogue much reduced prices; some of them probably below cost. Hope our customers, old and new, will take advantage of this opportunity and give us orders, which will be filled with quality, service and value, together with promptness.

Thanking you again for your past patronage and soliciting your further orders in future, we beg to remain,

Yours very truly,

OVERLOOK NURSERIES.

LINING OUT STOCK

Plants under this heading may be the one growing in the field, in plant bed under lath shade, in cutting bed, in seed bed, or in pot.

All plants, with exception of potted ones, will be carefully dug in bare root, trying not to injure any part of it, puddled immediately and packed with properly moistened moss, so to reach destination fresh with original dampness. Plants in pots are to be taken out from the pots and wrapped separately in paper, giving all original dirt. However, if so preferred dirt may be shaken off and wrapped in paper with moistened moss. The work will be done with our utmost care that customers will receive the plans in just same conditions as shipped with dirt. So doing you save much on expressage and we a part of packing expense; 5% discount allowed for this account of our part.

REMARKS: (C) indicates from Cutting, (S) Seedling, (G) Grafting, (T) Once Transplanted, (TT) Twice Transplanted.

LINING OUT CONIFERS

ABIS FIRMA (Japanese Fir)

	10	100	1000
4-6 inch (S), 3 years	$	$ 5.00	$45.00
6-8 inch (S), 3 years	1.00	7.50	
8-10 inch (S), 3 years	1.75	15.00	

CEDRUS DEODARA

4-6 inch (S) (T), 2 years	.75	5.00	
6-8 inch (S) (T), 2 years	1.25	8.50	
8-12 inch (S) (T), 2 years	1.50	12.00	

CHAMACYPARIS LAWSONIANA ALUMEI (Blue Lawson Cypress)

A most beautiful Lawson Cypress with deep blue colored compact foliage. Thrive at the South as well as up the North.

4-6 inch (C) (T)	1.00	7.50	
6-8 inch (C) (T)	1.25	9.50	

CHAMACYPARIS LAWSONIANA ARGENTEA (Silver Lawson Cypress)

Similar to Alumei, but leaves are rather whitish and finer texture.

4-6 inch (C) (T)	1.50	12.00	

CRYPTOMERIA JAPONICA VAR YOSHINO

Parent trees of this variety were imported years ago from Japan by us, and we are in belief that no other nurseries in this country ever propagating, so far known to us, this particular variety. It has much finer leaves and more compact growing character than common Cryptomeria Japonica. It grows in symmetrical pyramidal shape. Your attention is called to the point that the leaves change no color in winter nor get burnt in summer like the other. It thrives well where common Cryptomeria Japonica fails to do so. Try once, it will never disappoint you.

6-8 inch (C) (T), 2 years	1.75	15.00	
8-10 inch (C) (T), 2 years	2.25	20.00	

CUNNINGHAMIA LANCEOLATA (Chinese Fir)

It closely resembles to Araucaria but the foliages are narrower, brighter green and less rigid. It has very much more resisting power against cold than Araucaria; it stands the zero weather! Stately and graceful appearance will be given in both individual and group plantings. This is only variety in fir-like conifer, thrives well in the South. Very vigorous grower.

	10	100	1000
4-6 inch (C) (T)	1.00	6.00	

CUPRESSUS SEMPERVIREN PYRAMIFALIS (Royal Italian Cypress)

We offer here only those propagated by cuttings from typical narrow, compact, columnar trees.

6-8 inch (C) (T)	1.25	9.00
8-10 inch (C (TT)	1.50	12.00

JUNIPERUS CHINENSIS COLUMNALIS

This particular variety was introduced from China. It reaches approximately 20 feet in height. Very narrow columnar shape with very compact growth. There are two kinds in existence, one green and the other blue. Ours is the one with blue foliage, and grafted.

6-8 inch (G) (TT), 2 years	6.50	60.00
8-10 inch (G) (TT), 2 years	7.50	70.00

JUNIPERUS CHINENSIS PFITZERIANA (Pfitzer Juniper)

One of the best low growing junipers. Very popular in all sections.

2-4 inch (C) (T)		6.00
4-6 inch (C) (T)	1.25	9.00

JUNIPERUS CHINENSIS PROCUMBENS (Trailing Juniper)

Best known of the prostrate creeping juniper. A dense mat of blue green foliage. Extremely hardy.

2-4 inch (C) (T)		7.00
4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	12.00

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are in uniform of medium broad symmetrical pyramidal shape.

4-6 inch (C) (T)	1.00	7.00

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

4-6 inch (C) (T)	1.00	8.00

JUNIPERUS COMMUNIS DEPRESSA (Canadian Juniper)

A low spreading Juniper. Very hardy and rapid grower. Ours being propagated by cuttings from best shaped specimens they are far superior to those of seedling.

4-6 inch (C) (T)	1.00	8.00

JUNIPERUS COMMUNIS DEPRESSA AUREA
(Canadian Golden Juniper)

Demand being far greater than our supply on account of superiority of our stock, we have only limited quantity this season.

	10	100	1000
2-4 inch (C) (T), 2½ inch pots	1.25	10.00	

JUNIPERUS EXCELSA STRICTA
(Spiny Greek Juniper)

Well known dwarf vareity in conical shape. Grows rather slow but very hardy.

3-6 inch (C) (T)	1.25	10.00
6-8 inch (C) (T), field grown	3.00	25.00

JUNIPERUS VIRGINIA GLAUCA (Silver Juniper)

Known as Silver Juniper. Ours was grafted last spring and grown one year under lath. Can lining out in the field with perfect safety.

6-8 inch (G) (TT), 2 years	5.00	45.00
8-10 inch (G) (TT), 2 years	6.00	55.00
10-12 inch (G) (TT), 2 years	7.50	70.00
12-15 inch (G) (TT), 3 years	9.00	

JUNIPERUS ELEGANTISSIMA LEE
(Golden Tip Juniper)

A most beautiful juniper. Especially so when new growth, which is rich creamy golden color, appears with old green foliages in contrast.

6-8 inch G) (TT), 2 years	5.00	45.00
8-10 inch (G) (TT), 2 years	6.00	55.00
10-12 inch (G) (TT), 2 years	7.50	70.00

JUNIPERUS VIRGINIA CANNATI

Shape and habit are the same as Glauca, but foliages are bright green. It grows well down south as well as up north.

6-8 inch (G) (TT), 2 years	5.00	45.00
-10 inch (G) (TT), 2 years	6.00	55.00

JUNIPERUS VIRGINIA KOSTERI

Semi-dwarf. Closely resembles in appearance to Pfitzer Juniper, but grows slightly taller than the other. Spreads naturally with dense foliages of light blue. It also thrives well down south as well as north.

3-5 inch (C) (T)	1.75	15.00
6-8 inch (C) (TT), field grown	3.00	25.00

PINUS DENSIFLORA (Japan Red Pine)

12-18 inch (S), 3 years	4.00	30.00
18-24 inch (S), 3 years	6.00	50.00

PODOCARPUS SINENSIS MACROPHYLLA
(Large Leaved Japan Yew)

Dark green leaves with upright stem. Thrive well in sunny spot as well as in shady place. Growth of this variety is not so slow as the other yews, particularly our strain is in nature of upright growth and ver yrapid grower with large leaves.

4-6 inch (S)		3.00
6-8 inch (C) (T)	1.00	6.00
8-12 inch (C) (T)	1.25	9.00
12-18 inch (C) (T)	1.75	14.00
18-24 inch (C) (TT)	2.50	20.00
24-30 inch (C) (TT)	3.00	25.00

RETINOSPORA FILIFERA AUREA
(Golden Thread Leaved Retinospora)

A graceful compact evergreen conifer with pendulous thread like branches. Its golden color is exceptionally attractive.

	10	100	1000
3-5 inch (C) (T)	1.25	10.00	
6-8 inch (C) (TT), 2 years	2.00	15.00	

RETINOSPORA LEPTOCLADA

Entirely different from Retinospora Seiboldi which is called by Western nurserymen R. Leptoclada. Dwarf and rather slow grower, short branches and very compact appearance. Leaves very small but not like scale, rather resemble to R. Obtusa Nana. Grayish green in spring and summer and turns purple in winter. Very desirable variety.

3-5 inch (C) (T)	1.25	10.00

RETINOSPORA OBTUSA CRIPSII AUREA

Plant is semi-dwarf. One of the most unique golden coniers with graceul ern like oliage, the outter tips of all the branchlets shading into golden yellow.

4-6 inch (C) (T)	1.75	15.00
8-12 inch (C) (TT)	3.50	

RETINOSPORA OBTUSA NANA COMPACTUM

Dwarf Japanese Cypress. Very dense foliage with bright green color. Very compact grower. One of the best dwarf varieties.

2-4 inch (C) (T)	1.75	15.00
4-6 inch (C) (TT)	3.00	25.00

RETINOSPORA PISIFERA AUREA
(Golden Sawara Cypress)

Strong growing, rather open habit, pyramidal form, graceful golden foliage.

4-6 inch (C) (T)	1.00	7.50
6-8 inch (C) (T)	1.25	9.00

RETINOSPORA PLUMOSA (Green Plume Cypress)

Rapid grower, with foliage arranged in billowy plumes of a rich green. Its irregular outline is pleasing in soft artistic taste in landscape. Thrives very well in the Gulf States as well as in Atlantic coast.

4-6 inch (C) (T)	.75	5.00	40.00
6-8 inch (C) (T)	1.00	6.00	50.00
8-12 inch (C) (TT), 2 years	1.25	9.00	
12-18 inch (C) (TT), 2 years	2.00	15.00	

RETINOSPORA PLUMOSA AUREA
(Golden Plume Cypress)

Similar to the above, but its new growth is decidedly golden and very attractive. It grows somewhat slower than green Plumosa.

4-6 inch (C) (T)	1.00	6.00	50.00
6-8 inch (C) (T)	1.25	8.00	70.00
8-10 inch (C) (TT), 2 years	1.50	10.00	
10-15 inch (C) (TT), 2 years	2.00	15.00	

RETINOSPORA PLUMOSA ARGENTEA
(Silver Tip Dwarf Plume Cypress)

Silver tipped retinospora of extremely compact and very dwarf growth. Its being in shape of perfectly globular, most suitable for urn, beside formal planting in garden.

4-6 inch (C) (T)	1.00	7.50
6-8 inch (C) (T)	1.25	9.50

RETINOSPORA SQUARROSA SIEBOLDI
(Andely Cypress)

A broad pyramidal with fine juniper-like blue green foliage.

	10	100	1000
2-4 inch (C) (T)	1.00	7.00	

RETINOSPORA SQUARROSA SULPHUREA

It resembles to R. Plumosa Aurea but more characterized as Squarrosa.

4-6 inch (C) (T)	1.25	8.00	

RETINOSPORA SQUARROSA VEITCHII

Pyramidal but irregular outline together with fine soft foliage of silvery blue green arranged in billowy masses like clouds of smoke gives highly artistic effects to your garden .

4-6 inch (C) (T)		6.00	50.00
6-8 inch (C) (T)	1.25	8.00	70.00
8-10 inch (C) (TT), 2 years	1.50	10.00	
10-15 inch (C) (TT), 2 years	2.00	15.00	

THUJA ORIENTALIS AUREA NANA

We propagate only by cutting or grafting with scions from true Berckman's Golden and absolutely true to type.

4-6 inch (C) (T)	1.00	9.00
8-10 inch (C) (TT), field grown	2.50	20.00
10-12 inch (C) (TT), field grown	3.00	25.00

THUJA ORIENTALIS BAKERIE

Prettiest of all pyramidal arbor vitaes. Pleasing bright green color, retaining whole summer and winter.

2-4 inch (C) (T)		6.00
4-6 inch (C) (T)	1.00	8.00
8-10 inch (C) (TT), field grown	2.00	15.00
10-12 inch (C) (TT), field grown	2.50	20.00

THUJA ORIENTALIS BONITA

Compact, dwarf cone-shaped, with foliages of rich green color which remains unchanged through the year.

4-6 inch (C) (T)	1.00	8.00

THUJA ORIENTALIS COMPACTA

Closely resembles to Bonita but broader and more globular in shape. It grows in most any soil and location.

4-6 inch (C) (T)	1.00	8.00

THUJA ORIENTALIS GLAUCA
(Blue Green Arbor Vitae

Commonly called blue-green arbor vitae. Closely resembles to Rosedale Hybrid, but color of the foliage is slightly deeper blue. Grows satisfactory in the South.

4-6 inch (C) (T)	1.25	8.00
6-8 inch (C) (T)	1.50	10.00
10-15 inch (C) (TT), field grown, very bushy	2.00	15.00

THUJA ORIENTALIS ROSEDALE

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (TT), field grown	1.50	12.00
8-10 inch (C) (TT), field grown	2.00	15.00

THUJA ORIENTALIS TEXANA GLAUCA

Strong and rapid grower. Tall and slender with blue foliage.

6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (TT), field grown	2.00	15.00

LINING OUT BROAD LEAVED EVERGREEN

	10	100	1000
ABELIA GRANDIFLORA			
6-8 inch (C), field grown	$	$ 4.00	$30.00
8-12 inch (C), field grown	1.00	6.00	50.00
12-18 inch (C), field grown	1.25	9.00	80.00

AZALEA INDICA AND HARDY JAPANESE AZALEA (Named Varieties)

City of Mobile has been known last several years to the world as "Azalea City". Besides those already planted many years ago annual plantings in public places and private residences are totaled many times of a thousand. We dare to say there is no floral display equal to that of Mobile in spring when Azaleas in full bloom. No wonder so many visitors pour in this Gulf City from every direction, March to May, simply to see these beautiful views. Azaleas, in contrary to general belief or rather guess, are by no means hard to grow, providing a certain requirement fulfilled. We are in strong belief that Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina, and hardy Japanese Azaleas still farther north to the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in said territories to try more or less like we did years ago. A few cultural suggestions as the following:

1. Azaleas thrive in soil of acidity. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case Azalea to be planted in such a soil remove original soil and use plenty of leaf mold or peat moss mixed with the other soil, no alkali contained or apply Alminum Sulphate at the rate of 4-inch pot full to a wheelbarrowful of soil.

3. As Azalea root system is very shallow it dries fast. Give enough water to keep roots moist always.

4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be selected where all surplus water will run off quickly.

5. Azalea thrives best at partly shady place (when the bush grows large it stands in full sunlight) but many good blossoms cannot be expected if planted under entire shade.

6. Azalea is not very gross feeder. If plenty of leaf mold or such rotten organic matter applied on it does not require any commercial fertilizer. On contrary very often heavy application of fertilizer injures the root system. However, if necessary light application of well rotten cow manure sheep manure or cotton seed meal is beneficial.

7. Red spider and Thrip some times trouble the growers! Frequent syringing of the plant with plain water will usually keep it down. If this does not control spray or dust the plant with sulphur mixtuer.

AZALEA INDICA (SINGLE FLOWERING DESCRIBED IN VARIETIES

BRILLIANT—This is a splendid variety of watermelon red. Color of flower is slightly darker than the "Pride of Mobile. It blooms early to late profusely. Leaves small.

BRICK DUST—A low headed bush and very compact grower. size of flower medium to large, light orange red color, late bloomer, leaves rather narrow.

DUC DE ROHAN—Flower single, medium size, very pretty salmon pink. Leaves shiny and small. Low headed compact growth.

FORMOSA—A most popular variety. Flowers single and large, lavender. Leaves medium to large. Very thrifty easiest of all to grow.

GEORGES' ,FRANC—Profuse early bloomer. Flower large flame pink with deep carmine spot near throat. Exceptionally fine, very rare.

HARRY VEITCHII—A beautiful pink flower. Petal is not pointed out so much as the other varieties. Leaves medium, roundish. One of the best pink azaleas but rather slow grower.

INDICA ALBA—Large single, pure white flower. Rapid and upright grower. Very hardy, successfully planted even in Long Island.

INDICA ROSEA MAGNIFICA—Distinct type from the other Indica varieties. Hardy, rapid and upright grower. Foliage very large and thick; sticky secretion from its leaves. Flower single, very large, perhaps largest of all azaleas, white with rose throat, being resembled to some of orchid flowers.

IVERYANA—Rather low compact grower. Flower richly striped with pink on white ground. Leaves narrow, shiny green. One of the best variegated varieties of single flowering. Color of this flower occasionally changes to almost plain white, leaving only faint pink in stripe. However, this is not true Iveryana! Our propagation was done with carefully selected stock and eliminated the other.

MAXWELL—Very hardy. Flower large, carmine red. Leaves rather roundish, soft texture and light green when young.

OMURASAKI—Very large single flower, light lavender. Leaves also very large. Vigorous grower.

PRIDE OF DORKING—Flower large, ceries or bright red late bloomer. Leaves medium, dark green. Hardy, vigorous grower. One of the best varieties.

PRIDE OF MOBILE (Big Leaved Watermelon Pink)—It was known simply as "Big Leaved Watermelon Pink" until a year ago. However, it has now right name, "Pride of Mobile," as this variety not found elsewhere but Mobile and vicinity. It is vigorous grower, well balanced in shape, tall and spreading also. A splendid specimen of this variety could be seen in Spring Hill, Ala., suburb of Mobile, single plant of 12 feet in height covering 100 square feet. In spring, at height of the season, the plant covered, giving no open space, with bright watermelon pink flowers in mass, forming solid ball of pink in enormous size. It stands also against much severer temperature than most of the other Indica varieties can. This is one of the best single flowering azaleas without question.

PRAESTANTISSIMA—Closely resembles to Pride of Dorking, but blooms a week to ten days earlier.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all azaleas. Late bloomer. Leaves medium, dark shiny green. Rather low headed with compact growth.

SHELL PINK—Unable to find original name, but known to us as "Shell Pink" commonly called. Flower light pink, blooms very early. It begins to bloom right after Christmas when there is no flower of any kind in garden. Upright growth and not compact.

VITATA FORTUNEI—Flower single, well striped with purplish pink on white ground. Leaves medium, roundish. Vigorous upright growth, not compact. Blooms very early, as early as Shell Pink. Once in a while solid lavender flower appears among Vitata Fortunei. Selection was made by us with extra pain at the time of propagation—all plain purple flowered plants were eliminated.

HARDY JAPANESE AZALEAS

BENIGIRI—Compact upright grower. Leaves small, dull green. Flower small but abundant, deep bright red.

CHRISTMAS CHEER—A real pleasing Christmas red. Small dark glossy green leaves. Hose-in-hose type.

FLAME—Brilliant mud red, very early bloomer. Upright and vigolous grower.

HINODEGIRI—Most popular hardy Japanese azalea. Dwarf compact grower. Leaves glossy green, roundish. Abundant flowers of bright scarlet color. Ideal for pot plant.

PINK PEARL—Most noble salmon red color shading light to center, large full trusses, hose-in-hose type.

YAYEGIRI—Leaves rather thin but very shiny green. Flower salmon red, hose-in-hose type.

	10	100	1000
4-6 inch, 2½ inch pots	$1.50	$12.00	$110.00
6-8 inch (C) (TT), lathhouse grown, B&B	3.50	30.00	

BERBERIS ATROCARPA (Evergreen Berberry)

It resembles very much to Barberry Sargentii, though this variety could not stand severe cold but very fast grower and is well adapted for the south.

4-6 inch (C) (T)	1.00	7.00
6-8 inch (C) (T)	1.25	10.00
8-10 inch (C) (T)	1.50	13.00
10-18 inch (C) (TT)	3.50	30.00

BOTTLE BRUSH (Callistemen)

A beautiful low headed evergreen shrub. Bright red flowers in cylindrical brush-like spikes opening at spring, and sometimes in fall again.

6-8 inch (C), 2½ inch pots	2.00	15.00
8-10 inch (C), 2½ pots	2.50	20.00

BOUGAENVILLEA, CRIMSON LAKE

The best of Bouganvillea. Very rich brilliant crimson-like color and more profuse bloomer than any other variety. Florists grow it in pot for holiday trade, while in Southern Florida and Southern California raised outside for climbing vine.

4-6 inch, 2½ inch pots	2.00	15.00

BUXUS JAPONICA

In the South this variety is much preferred to English Boxwood (Buxus Sempervirens) as it stands the hot southern sun and grows much faster.

3-5 inch (C) (T)		5.00
5-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T), 2 years	1.75	15.00

BUXUS SEMPERVIRENS (English Boxwood)

4-6 inch (C) (T)		5.00
6-8 inch (C) (TT)	1.00	8.00
8-12 inch (C) (T)	1.50	12.00

CAMELLIA JAPONICA (Double Flower, Assorted) Colors, strictly separated)

One of the most popular plants in the Gulf Coast region, with glossy green foliage and attractive flowers at winter when no other blossoms found in garden. Very dense and symmetrical in its growth. Propagated only by cuttings taken from the specimens in merit. All colors separated that are white, red, pink and several different types and colors of variegation. All double flowers .

3-5 inch, from cutting beds	1.00	8.00
4-6 inch (C), 2½ inch pot	2.00	15.00
6-10 inch (C), 2½ inch pot	3.00	25.00
10-12 inch (C), 3 inch pot	4.00	35.00
12-15 inch (C), 3 inch pot	5.00	45.00
15-18 inch (C), 4 inch pot	7.50	70.00

CAMELLIA JAPONICA (Seedling)

Most suitable evergreen border. Flowers mostly single but abundant. Foliage very dark glossy green, much less trouble with scale. Grows considerably faster than double flowering camellias and thrives even under unfavorable conditions. Usable also stock for grafting.

3-5 inch (S)		6.00
5- inch (S), 2 year old	1.25	10.00
8-12 inch (S), 2 year old	1.75	15.00

CAMELLIA SASANQUA (Double White Flower—Mineno-yuki)

Smaller leaved in camellia family. It gives more shrubby effects and softer taste to landscape gardening. Vigorous grower and free from scale. Bloom in October and November.

3-5 inch from cutting bed	1.00	7.00
4-6 inch (C) (T)	1.50	10.00
8-12 inch (C) (T)	2.00	15.00
12-18 inch (C) (T)	2.50	20.00

CAMELLIA SASANQUA (Single Flower, White, Pink and both Mixed)

3-5 inch from cutting bed		6.00
4-6 inch (C) (T)	1.25	9.00
8-12 inch (C) (TT), 2 years	2.00	15.00
12-18 inch (C) (TT), 2 years	2.50	20.00

CAMELLIA THEA (Tea Plant)

Sweet scented flower in late fall. A fine evergreen shrub.

6-8 inch (S)		4.00
8-10 inch (C), 2 years	.75	6.00
10-18 inch (S), 2 years	1.00	8.00

CASSIA FLORIBUNDA (Evergreen Flowering Senna)

Evergreen senna. A shrub of medium height, bearing a profusion of bright yellow flowers throughout late summer and fall. Hardy at the Gulf Coast and Florida.

	10	100	1000
6-8 inch (S)		4.00	
8-12 inch (S)	.75	6.00	
12-18 inch (S)	1.25	10.00	

CINNAMOMUM CAMPHORA (Camphor Tree)

12-18 inch (S), 2 years		6.00
18-24 inch (S), 2 years	1.00	8.00

CINNAMOMUM LAURERII (Real Cinnamon Tree)

Real Cinnamon tree. Closely resembles to Camphor. Very desirable evergreen, particularly at the Gulf Coast region.

6-8 inch (S), 2 years	1.00	7.50
8-10 inch (S), 2 years	1.25	10.00
10-12 inch (S), 2 years	1.50	12.50

CLEYERA JAPONICA

A splendid evergreen shrub with thick glossy leaves and creamy white fragrant flowers. Berries red in winter. An upright grower reaching height of 10 to 12 feet. Ours being propagated by cuttings from best specimens, superior in every respect to those from seed.

4-6 inch (C) (T)	1.25	10.00
6-8 inch (C) (T)	1.75	15.00
8-12 inch (C) (T)	2.25	20.00
12-18 inch (C) (T)	3.50	30.00

COTONEASTER PANOSA

One of the well thriving Cotoneasters in the Southern climate. Silvery leaves together with abundant red berries are most attractive.

6-8 inch (C) (T)	1.00	6.00
8-12 inch (C) (T)	1.25	10.00

DAPHNEPHYLLUM MACROPODUM

A very attractive shrub or small tree with large evergreen leaves, which are smooth and shining green with bluish glaucaus underneath young twigs red, well adapted to southern states.

4-6 inch (S)	1.25	10.00
6-8 inch (S)	1.50	12.50
8-12 inch (S)	2.00	15.00

ELAEAGNUS PUNGENS VARIEGATA (Yellow Edge Elaeagnus)

ELAEAGNUS PUNGENS MACULATA (Yellow Center Elaeagnus)

Both of them variegated, but one has yellow center with dark green margin, the other yellow edge and green center that will not be changed by sun nor cold. Most beautiful evergreen shrub among other dark green shrubs.

4-6 inch (C) (T)	1.50	11.00
6-8 inch (C) (T)	1.75	15.00

ELAEAGNUS PUNGENS

Shiny green leaves with silvery beneath.

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

ELAEAGNUS PUNGENS SIMONI

Leaves large and more roundish; hardy and good grower.

ELAEAGNUS PUNGENS JENNY

With shiny large leaves; very desirable variety.

ELAEAGNUS PUNGENS DWARF THORN

Leaves smaller and narrower and more spiny than any above variety. Dwarf and compact and very bushy.

	10	100	1000
4-6 inch (C) (T)	1.00	8.00	
6-8 inch (C) (T)	1.25	10.00	

EUONYMUS CARRIERI

Similar to Euonymus Radicans but not creeper. Leaves shiny green, but some times turn to bronze color after severe frost. It grows well in sun as well as in shade; very hardy.

8-12 inch (C) (T)		6.00	
12-18 inch (C) (T)	1.00	8.00	

EUONYMUS PATENS (E. Sieboldi)

Broad and more spreading habit in growth. Said semi-evergreen in the north, but leaves stay green entire winter in the southern states. Brilliant scarlet berries in fall are most attractive. Absolutely hardy.

8-10 inch (C) (T)	1.00	8.00	
10-15 inch (C) (T)	1.25	10.00	

FATISIA JAPONICA

Much resembles to Aralia Spinosa, but this is evergreen and stand much colder temperature without losing leaves. Foliage large and glossy shiny green with shape of five fingers spread. Thrives in shady place where most of other plants can't grow. We offer this season only small seedling plants.

2-4 inch (S)		5.00	40.00

FEIJOA SELLOWIANA (Pineapple Guava)

Compactly growing shrub. Leaves green with silverly underneath. One of most desirable plants for the Gulf Coast.

6-8 inch (C or S)	1.00	8.00	
8-12 inch (T)	1.50	10.00	

GARDENIA FLORIDA (Cape Jessamine)

Well known evergreen shrub under the name of Cape Jessamine. Leaves large glossy dark green. Flowers large double, pure white. Very highly scented. Hardy outdoor plant as far north as Nashville.

6-8 inch (C) (T)		4.00	
8-12 inch (C) (T)	1.00	7.00	
12-18 inch (C) (T)	1.50	10.00	

GARDENIA RADICANS (Creeping Cape Jessamine)

It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. A very plant for rock garden. Doubtless suitable to florists for Mother's Day trade as well as that of Memorial Day.

2-4 inch, from cutting bed		3.00	
4-6 inch C), 2½ inch pots	1.50	10.00	
6-8 inch (C), 3 inch pots	2.50	20.00	

GARDENIA STRICTA NANA (Dwarf Cape Jessamine)

Closely resembles to Gardenia Florida but smaller. Very dwarf compact growth. Most ideal for pot plant or border.

	10	100	1000
2-4 inch, from cutting bed		3.00	
4-6 inch (C), 2½ inch pots	1.50	10.00	
6-10 inch (C), 3 inch pots	2.50	20.00	

GARDENIA VEITCHII (Winter Blooming)

Winter blooming gardenia. This is the very variety Eastern florists estimate very highly for winter cut flowers. We have this year exceptionally fine stock of this variety to offer.

3-5 inch, from cutting bed		5.00
4-6 inch (C), 2½ inch pots	2.00	15.00

HIBISCUS ROSA SINENSIS

(Single red, double red and peachblow)

4-6 inch (C), 2½ inch pots	1.00	6.00
8-12 inch (C), 3 inch pots	1.50	12.00
10-15 inch (C), 4 inch pots	2.50	20.00

ILEX CRENATA (Japanese Dwarf Holly

A much branched evergreen shrub, with oval, crenate leaves. A splendid specimen and also desirable for hedge planting.

3-5 inch (S) (T)	1.00	8.00
5-8 inch (S) (TT)	1.25	10.00
8-12 inch (S) (TT)	1.75	

ILEX VOMITORIA (Berry Bearing Yaupon)

4-6 inch (C) (T)	1.52	10.00
6-8 inch (C) (T)	1.50	12.00
8-12 inch (C) (T)	1.75	15.00

ILLUCIUM ANISATUM

A handsome hardy broad leaved evergreen shrub or small tree. Smooth entire, light green foliage, anise scented when bruised. Narrow and upright in habit of its growth; very hardy.

4-6 inch (S)	1.00	7.00
6-8 inch (S)	1.25	10.00
8-12 inch (S)	1.75	15.00
12-18 inch (S)	2.50	

JASMINUM PRIMULINUM

Chinese Primrose Jessamine. Evergreen shrub with arching branches and thick green leaves. Bright yellow flower in spring. Very vigorous grower.

10-15 inch, strong layer		4.00
12-18 inch (T), field grown	1.25	10.00

LAUROCERASUS CAROLINIANA (Cherry Laurel)

A well known native evergreen. Compact glistening green foliage of medium size. Very attractive as foundation planting, especially in large estate or in park. It also is effective for formal planting when sheared in standard, pyramidal or other shape.

6-8 inch (S)		3.00	25.00
8-10 inch (S)		5.00	40.00
10-12 inch (S)	1.00	7.00	60.00
12-18 inch (S)	1.25	10.00	

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. Very useful plant for southern planting.

	10	100	1000
3-5 inch, from cutting bed	1.00	6.00	

LAURUS NOBILIS (Grecian Bay)

A beautiful evergreen with glossy dark green leaves which are very aromatic and used in cooking. This shrub thrives very well on the Gulf Coast. Can be sheared to any shape you may prefer.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	2.50	20.00
12-18 inch C) (TT)	3.50	30.00

LIGUSTRUM CILIATUM VARIEGATUM (Iwaki Privet)

Compact grower, rather small, thick, roundish. Leaves faintly blotched with pale yellow. Although this is not quite so hardy as some of the other Ligustrums, undoubtedly best dwarfed and compact privet in the South.

LIGUSTRUM LUCIDUM COMPACTUM (True Waxy Privet)

Our strain is in extra dense compact growth with very dark waxy green thick leaves. Very hardy and thrives in most any kind of soil with no particular attention for care. Indeed this is most satisfactory plant for general planting.

LIGUSTRUM LUCIDUM PYRAMIDALIS (Upright Waxy Privet)

Its growth is decidedly erect and narrow in form. Leaves dark green and glossy but rather pointed at end and not quite so thick as Compactum.

LIGUSTRUM REPANADA (Crinkled-leaf Privet)

Closely resembles to Ligustrum Pyramidalis but leaves narrow and crinkled.

3-5 inch from cutting bed		3.00	25.00
4-6 inch (C) (T)		4.00	35.00
6-8 inch (C) (T)	.75	5.50	45.00
8-12 inch (C) (T)	1.00	7.50	65.00
12-15 inch (C) (T)	1.25	9.00	80.00
12-18 inch (C) (TT), field grown, very bushy	2.00	15.00	140.00
18-24 inch (C) (TT), field grown, very bushy	3.00	20.00	180.00

LIGUSTRUM LUCIDUM NEPALENCE

Well known hardy privet with rather small thick leaves.

LIGUSTRUS LUCIDUM GRACILIS (Griffing)

Upright growth with graceful, curving branches. Leaves pointed, thick, shiny, dark green.

LIGUSTRUM LUCIDUM BLACK LEAF (Griffing)

A medium upright type with glossy, heavy foliage; compact grower.

3-5 inch, from cutting bed	3.00
4-6 inch (C) (T)	6.00

LIGUSTRUM JAPONICUM MACROPHYLUM (Big Leaf Japan Privet)

A greatly improved strain of Ligustrum Japonicum. Distinguished by exceedingly large thick glossy leaves. The true type and form could only be obtained by grafting .

	10	100	1000
8-12 inch (G), field grown	2.00	18.00	
12-18 inch (G), field grown	3.00	25.00	

LIGUSTRUM CHINENSIS (Armur River Privet South)

8-12 inch (S), field grown	1.00	5.00
12-18 inch (S), field grown	1.50	10.00
18-24 inch (S), field grown	2.00	15.00
2-3 feet (C), field grown, very bushy	3.00	25.00
3-4 feet (C), field grown, very bushy	4.00	30.00

LIGUSTRUM OVALIFOLIUM AUREUM (Manda's Golden Privet)

Golden variegated California privet. Hardy and pretty bush. More showy when planted among green varieties.

4-6 inch (C) (T)		5.00
8-12 inch (C) (T)	1.00	8.00
12-18 inch (C) (T)	1.25	10.00

LIGUSTRUM OVALIFOLIUM LODENS

4-6 inch (C) (T), field grown	3.00
6-10 inch (C) (T), field grown	5.00

LIGUSTRUM IONANDUM

Recent introduction by an agricultural explorer. Leaves very small, like boxwood. On account of its dwarfness most desirable for low hedge or border planting.

6-8 inch (C) (T)	1.00	8.00
8-10 inch (C) (T)	1.25	10.00

LIGUSTRUM REEVISEE

It resembles Armur River South, but leaves very small and dwarf grower. Most suitable for low hedge.

8-12 inch (C) (T)		5.00
12-18 inch (C) (T), field grown	1.00	7.00
18-24 inch (C) (T), field grown	1.50	12.00

LONICERA PILCATA

Dwarf shrub with boxwood-like foliage. Good for low border.

2-4 inch (C) (T)	1.00	8.00

MAGNOLIA FUSCATA (Michelia Fuscata)

Well known Southern shrub with handsome compact evergreen foliage and sweet carmine edged yellow flower which has strong banana-like fragrance. One of the very useful plants for Southern landscape gardening.

6-8 inch (C) (T)	1.50	12.00
8-10 inch (C) (T)	1.75	15.00
10-12 inch (C) (T)	2.25	20.00
12-18 inch (C) (TT)	3.50	30.00
18-24 inch (C) (TT)	5.00	45.00

MALPIGHIA GLABRA (Barbadoe Cherry)

Low headed evergreen shrub with rosy flowers and red berries. Too tender for the northern planting, but most suitable for pot plant.

	10	100	1000
4-6 inch, from cutting bed		3.00	

MAGNOLIA GLAUCA (White Bay)

A native evergreen tree with large magnolia leaves underneath silvery gray.

4-6 inch, from cutting bed		4.00
6-8 inch, from cutting bed		6.00

MYRTUS COMMUNIS MICROPHYLLA

With small leaves and compact growth. Much superior to common myrtus.

4-6 inch C) (T)		5.00
6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (TT)	1.50	12.00

NANDINA DOMESTICA

A pretty Japanese evergreen shrub, grows well in sun as well as in shade. Shape of the foliage and growing habit are entirely different from that of ordinary plants. It is most beautiful sight in winter when leaves turn to beautiful red color and scarlet berries in cluster hanging on.

2-4 inch (S)	.75	5.00
4-6 inch (S)	1.00	8.00
6-8 inch (S)	1.50	12.00
8-12 inch (S)	2.25	20.00
12-18 inch (S)	4.00	35.00

OSMANTHUS AQUIFOLIUM

This is hardiest of all Osmathus family. Thrives at New York, possibly as far north as Massachusetts. Leaves leatherly-smooth and shiny. Strong spines on both sides of foliage, somawhat resembles to Ilex Cornuta (Chinese Spiny Holly).

2-4 inch (C) (T)	1.50	10.00
4-6 inch (C) (T)	2.00	15.00

OSMANTHUS FORTUNEI

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.

2-4 inch (C), 2½ inch pots	1.50	12.00

OSMANTHUS FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind fill the air of entire garden with high odor during winter and spring.

3-5 inch, from cutting bed	1.00	7.50	60.00
10-12 inch (C) (T)	2.50	20.00	
12-18 inch (C) (TT)	4.00	35.00	
18-24 inch (C) (TT)	5.00	45.00	
8-10 inch (C), 2½ inch pots	2.50	20.00	
10-12 inch (C), 3 inch pot	3.00	25.00	

PHOTINIA GLABRA

Our introduction of a few years ago and not as yet known to general public (see the picture taken from one of the parent trees). It is a broad-leaved evergreen, very hardy.

PHOTINIA GLABRA

Whenever covered with new sprouts mass of burning scarlet, tinted here and there with older leaves of green, will surely convince you that this is one of the best trees ever appearing on the market. There are several different strains in existence; some of them are far inferior to ours. Years ago when we imported the trees from Japan careful selection was made. Out of the many trees imported we picked up the best few specimens for parent trees, eliminating all others. Ours are surely best and true red leaved Photinia guaranteed. It naturally grows 20 feet high with immense white flowers which are also very attractive. It gives most desirable effects when planted between evergreen conifers. It also gives a splendid view as planted individually in the lawn, trimming in any shape you may desire, such as pyramidal, standard or globe. Exceedingly attractive hedges can be laid also with this plant. Adaptable to almost any soil, yet well drained sandy soil seems more suitable than wet clay.

	10	100	1000
3-5 inch, from cutting bed		5.00	40.00
4-6 inch (C), 2½ inch pots	2.00	12.00	110.00
6-8 inch (C), 2½ inch pots	2.50	18.00	160.00
8-12 inch (C), 3 inch pots	3.50	25.00	225.00
12-18 inch (C), 3 inch pots	4.50	30.00	280.00
8-12 inch (C) (T), 2 years	1.50	9.00	70.00
12-18 inch (C) (TT), 2 years	1.75	12.00	100.00
18-24 inch (C) (TT), 2 years	2.50	20.0	180.00
24-30 inch (C) (TT), 2 years	3.00	25.00	225.00

PITTOSPORUM TOBIRA

Very dense compact growth with dark green shiny leaves clustered at end of branches. Most valuable plant for southern gardens.

3-5 inch, from cutting bed	3.00	25.00
4-6 inch (C) (T)		5.00
6-8 inch (C) (T)	1.00	7.00
8-10 inch (C) (T)	1.25	10.00

PITTOSPORUM TOBIRA VARIEGATA

2-4 inch, from cutting bed		4.00
4-6 inch (C) (T)	1.00	6.00
6-8 inch (C) (T)	1.25	8.00

PYRACANTHA LALANDI (Yellow Berried)

PYRACANTHA FORMOSANA (Orange Red Berried)

PYRACANTHA ANGUSTIFOLIA (Orange Red)

PYRACANTHA S. P. (Tiny Leaves, Bright Scarlet)

PYRACANTHA YUNNANENSIS (Coral)

PYRACANTHA GIBBSII (Scarlet)

Thorny evergreen with cluster of berries at fall and winter. Very attractive, more especially among green foliages.

4-6 inch (C) (T)		5.00
8-12 inch (C) (T)	1.00	9.00
12-18 inch (C) (T)	1.50	12.00
15-18 inch, field grown	2.50	17.50

QUERCUS ACUTA

One of the most beautiful evergreen oaks ever introduced from Japan. The leaves large, bright glossy green. Very rapid grower.

GUERCUS CUSPIDATA

	10	100	1000
6-8 inch (S), 2 years	1.00	7.50	
8-12 inch (S), 2 years	1.25	9.00	
12-18 inch (S) ,2 years	2.00	12.00	

QUERCUS LAURIFOLIA DARDINGTONIA

Very handsome form of evergreen or Laurel Leaved Oak. It grows more upright than Live Oak. Suitable to shade tree as well as avenue planting.

QUERCUS VIRGINIANA (Live Oak)

6-8 inch (S)		3.00
8-12 inch (S)		5.00
12-18 inch (S)	1.00	7.00
18-24 inch (S)	1.50	9.00

RAPHILOLEPIS JAPONICA

It grows taller than Ovata. Leaves thick leathery, oblong.

RAPHIOLEPIS OVATA

A very desirable low growing evergreen shrub. Leaves oval, thick and leathery. Mass of pinkish small flowers in spring. Persistent through cold weather.

4-6 inch (S), 2 years		5.00
6-8 inch (S), 2 years	1.00	6.00
8-10 inch (S), 2 years	1.25	10.00

SERISSA FOETIDA

A low growing evergreen shrub with tiny dark green leaves, yellow margined. Abundant small white flowers. Appearance of the plant somewhat resembles to that of Rock Cotoneaster. Very desirable shrub for border or rock garden. Can not stand too cold.

From cutting bed	3.00

VIBURNUM MACROPHYLUM

(Sweet Viburnum, used to be listed under name of Viburnum Odoratissimum). A valuable evergreen shrub with large green, oblong leaves which turn some times to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

4-6 inch, from cutting bed		4.00
12-18 inch (C) (TT), field grown	1.50	12.00

VIBURNUM ODORATISSIMUM

(Glossy Viburnum, used to be listed under the name of Viburnum Odoratissimum Nanum). Leaves large, oblong with points, polished dark green in color. Its growth is very compact and a little hardier than V. Macrophylum. As it bears berries of coral color it has been known in Japan as coral berried viburnum. This is one of the most promising broad leaved evergreens in the South.

3-5 inch, from cutting bed		4.00
4-6 inch (C) (T)	1.00	6.00

VIBURNUM RHYTIDOPHYLUM (Leather Leaf Viburnum)

Evergreen Viburnum with stout upright branches. Leaves thick ovate-oblong, deeply wrinkled above covered a thick gray or yellowish tomentum beneath. This is hardiest variety in group of evergreen viburnum against cold.

4-6 inch (C) (T)	1.25	10.00
6-8 inch (C) (T)	1.50	12.00

VIBURNUM SUSPENSUM

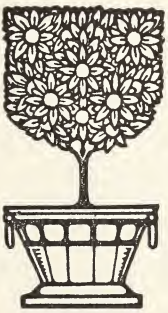
Another fine viburnum of Japanese origin. It somewhat resembles to Macrophylum but much smaller in every respect.

	10	100	1000
3-5 inch (C) (T)	1.00	8.00	
6-8 inch (C) (T)	1.25	10.00	

VIBURNUM TINUS

Small shrub of compact growth with little shiny green foliages.

6-8 inch (C) (T)	1.00	8.00	
8-10 inch (C) (T)	1.25	10.00	



LINING OUT DECIDUOUS TREES, SHRUBS, PALMS, VINES AND MISCELLANEOUS

ALBIZIA JULIBRISSIN (Mimosa Tree)

A beautiful ornamental shade tree with vigorous growth. Our strain is much superior to common mimosa growing around here as we propagated from original trees imported years ago from Japan after careful selection. Its flowers are larger in size and brighter red in color.

	10	100	1000
12-18 inch (S)		5.00	
18-24 inch (S)	1.00	7.50	
2-3 feet (S)	1.25	10.00	

CERCIS CHINENSIS (Japanese Redbud)

Much more dwarf than American Redbud. This particular character makes it more suitable to landscape planting.

6-8 inch (S) (T)		4.00	
8-12 inch (S) (T)	1.00	6.00	

CITRUS TRIFOLIATA

4-6 inch (S)		2.00	15.00
6-8 inch (S)		2.50	20.00

GINKO BILOBA (Maiden Hair Tree)

A most beautiful tree with rapid and erect growth. Free from insect diseases. Considerable number of the trees planted in Washington, D. C.

4-6 inch (S)		4.00	
6-8 inch (S)	1.00	6.00	

LARGESTROMIA INDICA (Crape Myrtle)

White, Crimson, Lavender and Dwarf Crimson.

12-18 inch (C), field grown	1.25	8.00	
18-24 inch (C), field grown	1.50	12.00	
24-30 inch (C), field grown	2.50	20.00	

MAGNOLIA SOULANGEANA PURPLIANA (Purple Chinese Magnolia)

A deciduous early flowering magnolia. Tulip-haped magnificent flowers before the leaves appear.

12-18 inch (G), 1-3 branched	10.00	80.00	

MALUS BECHTEL (Double Pink, Slow Grower)

10-12 inch (G), field grown	2.00	15.00	
12-18 inch (G), field grown	2.50	20.00	

MALUS FLORIBUNDA (Single Pink)

MALUS NIEDZWETZKYANA (Red)

MALUS SPECTABILIS (Double Pink)

MALUS EXCELENCA THELL (Weeping, Pink)

12-18 inch (G), field grown	2.00	15.00	
18-24 inch (G), field grown	2.50	20.00	

SAPIUM SEBIFERUM (Chinese Tallow Tree)

6-8 inch (S)		2.50	
8-12 inch (S)		4.00	
12-18 inch (S)	1.00	6.00	

STERCULIA (Japanese Varnish Tree)

	10	100	1000
6-12 inch (S), field grown		3.00	
12-18 inch (S), field grown	1.00	6.00	
18-24 inch (S), field grown	1.25	10.00	
24-36 inch (S), field grown	1.75		

EUONYMUS RADICANS (Winter Creeper)

A fine evergreen creeper with small shiny green foliage. Very hardy.

8-10 inch (C) (T)		5.00
10-12 inch (C) (T)	1.00	7.00

EUONYMUS RADICANS ARGENTO-MARGINATUM

Similar to the above but with foliage beautifully variegated in green and creamy white.

4-6 inch (C) (T)		6.00
6-8 inch (C) (T)	1.00	8.00

EUONYMUS KEWENSIS (Baby Winter Creeper)

Slender thread like vine with very tiny green foliage. One of the cutest creepers in existence. Suitable to covering stumps and rock piles and very plant for miniature garden.

4-6 inch (C) (T)		6.00
6-8 inch (C) (T)	1.00	8.00

HEDERAHELIX (English Ivy)

We have two kinds in stock. One big leaved and the other small. Specify when you order which one you prefer.

8-10 inch (C) (T)		6.00
10-12 inch (C) (T)	1.00	8.00

TRACHELOSPERMUM JASMINOIDES (Star Jessamine)

Finest vine to cover arbor, pagoda or screen. Leaves roundish oval, thick shiny green. Star shaped white flower very fragrant. Grand is the view when fully bloomed. If properly trained this is better pot plant than English ivy.

6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.25	10.00
12-18 inch (C) (T)	1.75	15.00

HONEYSUCKLE (Scarlet Trumpet)

Strong layer	5.00

CANNA

King Humbert Red (Red)	2.50
Apricot (Apricot)	3.50
Flame Bean (Yellow)	2.00
President (Bright Red)	2.25

4-5 feet	4.00	35.00	
SCUPPERNONG GRAPE (White)			
3 year old	2.00	15.00	125.00

SPECIMEN PLANTS

Plants under this heading are growing in the field, twice or more transplanted or roots pruned, compact symmetrical shape of being sheared or pinched. As they are growing on our well drained high land and have abundant fiberous roots they suffer therefore much less from transplanting. Dig them with utmost care of our skilled laborers, balled and burlapped or puddled with clay immediately, so to take no risk of root getting dry. If so desired plants may be shipped without B. & B. (balled and burlapped). Prices listed here include charges of B. & B. unless otherwise mentioned. Packing charges are extra at cost, if order not accompanied with cash. 25% allowance from these prices if taken in bare root (no tB. & B.) 15% discount for carload order. 20% discount for orders delivered at nursery grounds without boxing.

CEDRUS DEODARA

	Each	Ten
24-30 inch	$1.50	$12.00
